Security Breach Announcement

Liberty Resources, Inc. (LRI) is notifying its Consumers about a security breach which could have compromised some of their health information. LRI takes the security of Consumer health information very seriously, and is announcing that a personal computer was recently stolen that contained personal information of LRI Consumers in eastern Pennsylvania. Authorities have been notified of the theft and individual letters to each affected Consumer have been mailed.

The computer contained files that included Consumer names, Medicaid numbers and short summary information used for administrative purposes by Liberty Resources and Resources for Living Independently. There has been no indication that any information has been misused. The files on the computer **did not** include addresses, telephone numbers, social security numbers, or date of birth.

Liberty Resources takes its role of safeguarding personal information very seriously and using it only for permissible purposes in an appropriate manner. Staff are trained and receive annual re-training on securing and transporting confidential information; and policies require Staff to report the possible disclosure of personal information immediately. LRI will continue to review and revise its policies and procedures to bolster and ensure the security of personal information.

Liberty Resources will assist any affected Consumers with placing fraud alerts with credit bureaus and has established the LRI Quality Management Hotline at 1-888-634-2155 ext. 629,

specifically to provide needed assistance and to answer questions on this matter.

LRI is a non-profit, Consumer driven organization that advocates for and works with persons with disabilities to ensure their civil rights and equal access to all aspects of life in our community.
